PRODUCT DESCRIPTION

Dahle 20394 Level 6 Cross Cut High Security Paper Shredder In order to protect our National Security, military and government agencies require higher levels of security from their paper shredders. This Dahle High Security Shredder is NSA approved for NSA CSS Specification 02 01. The Dahle 20394 has a 16 Inch feed opening and is driven by a powerful 2 horsepower motor. A solid steel frame houses and aligns two perfectly matched cutting cylinders milled from a single bar of German Solingen steel. Its this design that maximizes durability and minimizes flexing to produce a consistently fine 1mm x 4.7mm particle size. This High Security Shredder uses the latest technology to offer full electronic capabilities including such safety features as Automatic Shutoff when the cabinet door opens and Auto Reverse to prevent an overfeed. Automatic On Off and Bag Full Auto Off are features that offer both convenience and satisfaction in knowing you will be notified when its time to empty the box or change the bag. This rather stout machine is housed in a wooden cabinet with casters making it easy to move and position in its place of operation.
